TRIDENT PUBLIC SCHOOL, GAVANDRA, EAST CHAMPARAN (BIHAR)

WEEKLY LESSON PLAN — COMPUTER

Session: 2026–2027 **Dates:** 2 November 2026 to 7 November 2026 **Class:** IV **Subject:** Computer **Teacher:** Kaushal Kumar

Weekly Topic: Scratch: Complete Introduction and Practical

Learning Objective: Understand the Scratch interface, use sprites and the Stage, and create a simple animated project using block-based coding.

Period / Date	Class	Subject	Topics to be Covered	Objective of the Topic	Classwork / Activity	H.W.	Teaching Aids
Mon, 2 Nov	IV	Computer	Introduction to Scratch; what is block-based programming; opening Scratch and exploring the interface	Identify the Stage, Sprite List, Blocks Palette and Coding Area	Explore the Scratch screen; identify main parts and start a new project	Write the names and uses of any four parts of the Scratch interface	Computer, projector, Scratch
Tue, 3 Nov	IV	Computer	Sprites, Stage, backdrop and sprite selection	Add, remove and select sprites; change the Stage backdrop	Choose a sprite, add a backdrop and rename the sprite	Draw the Scratch interface and label the Stage and sprite	Computer, Scratch, projector
Wed, 4 Nov	IV	Computer	Motion blocks: move, turn, go to and glide	Use motion blocks to control a sprite's movement	Create a simple movement sequence and test different values	Write any five Motion blocks and their uses	Computer, Scratch
Thu, 5 Nov	IV	Computer	Looks blocks: say, think, change size and switch costume	Change a sprite's appearance and display messages	Make a sprite speak and change its costume or size	Write a short sequence for a sprite to introduce itself	Computer, Scratch
Fri, 6 Nov	IV	Computer	Events and Sound blocks; starting a project with the green flag	Use event blocks to start actions and add simple sounds	Create an animated greeting using an event and sound block	Write the steps to start a Scratch project	Computer, headphones, Scratch
Sat, 7 Nov	IV	Computer	Mini project: Animated character; revision and practical assessment	Combine Motion, Looks and Events blocks in a simple project	Build and demonstrate a short animated story; teacher checks block sequence	Revise block categories and complete any unfinished project	Computer lab, practical checklist

Teacher's Signature: Kaushal Kumar Principal's Signature: Mithilesh Kumar

Note: CBSE-aligned sample plan. Adjust practical activities according to the school's prescribed Computer textbook, available software and lab facilities.

TRIDENT PUBLIC SCHOOL, GAVANDRA, EAST CHAMPARAN (BIHAR)

WEEKLY LESSON PLAN — COMPUTER

Session: 2026–2027 **Dates:** 2 November 2026 to 7 November 2026 **Class:** V **Subject:** Computer **Teacher:** Kaushal Kumar

Weekly Topic: MS Excel and Scratch: Spreadsheet Skills and Block Coding

Learning Objective: Create and format a simple spreadsheet, use basic formulas, and build a short Scratch animation using events and motion.

Period / Date	Class	Subject	Topics to be Covered	Objective of the Topic	Classwork / Activity	H.W.	Teaching Aids
Mon, 2 Nov	V	Computer	MS Excel introduction; workbook, worksheet and uses	Recognise the Excel window and explain workbook and worksheet	Open a workbook and identify the Ribbon, rows, columns and sheet tabs	Write two uses of MS Excel	Computer, MS Excel, projector
Tue, 3 Nov	V	Computer	Rows, columns, cells, cell addresses and data entry	Enter information accurately and identify cell addresses	Create a small student-details table and enter sample data	Define row, column, cell and cell address	Computer, MS Excel
Wed, 4 Nov	V	Computer	Basic Excel formatting and simple formulas: SUM and addition	Format a table and perform a basic calculation	Format headings and calculate a total using a formula	Write the formula used to add values in cells A1 and A2	Computer, MS Excel, worksheet
Thu, 5 Nov	V	Computer	Scratch introduction; interface, Stage, sprites and blocks	Identify Scratch work areas and select a sprite	Open Scratch, choose a sprite and change the backdrop	Write the names of four Scratch interface areas	Computer, Scratch
Fri, 6 Nov	V	Computer	Scratch Motion and Looks blocks	Make a sprite move and display a message	Create a short animation using move, turn and say blocks	Write any three Motion blocks and two Looks blocks	Computer, Scratch
Sat, 7 Nov	V	Computer	Combined revision and practical assessment: Excel table + Scratch animation	Demonstrate basic spreadsheet and Scratch skills	Create a formatted marks table and a short animated greeting	Practise the Excel total formula and revise Scratch blocks	Computer lab, assessment sheet

Teacher's Signature: Kaushal Kumar Principal's Signature: Mithilesh Kumar

Note: CBSE-aligned sample plan. Adjust practical activities according to the school's prescribed Computer textbook, available software and lab facilities.

TRIDENT PUBLIC SCHOOL, GAVANDRA, EAST CHAMPARAN (BIHAR)

WEEKLY LESSON PLAN — COMPUTER

Session: 2026–2027 **Dates:** 2 November 2026 to 7 November 2026 **Class:** VI **Subject:** Computer **Teacher:** Kaushal Kumar

Weekly Topic: CSS Fundamentals and Introduction to Artificial Intelligence

Learning Objective: Apply basic CSS rules to style a simple webpage and explain AI through familiar examples, uses and responsible practices.

Period / Date	Class	Subject	Topics to be Covered	Objective of the Topic	Classwork / Activity	H.W.	Teaching Aids
Mon, 2 Nov	VI	Computer	CSS introduction; purpose of CSS; inline, internal and external CSS	Explain how CSS controls the appearance of HTML pages	Observe a basic HTML page and identify where styling changes its appearance	Write the full form of CSS and name its three types	Computer, browser, code editor
Tue, 3 Nov	VI	Computer	CSS syntax, selectors and declarations	Write a basic CSS rule using a selector, property and value	Style paragraph and heading elements using element selectors	Write the basic structure of a CSS rule	Computer, code editor, projector
Wed, 4 Nov	VI	Computer	CSS colours, backgrounds, fonts and text properties	Change text and background appearance using CSS	Create a simple styled school information page	Write CSS properties for text colour, background colour and font size	Computer, browser, code editor
Thu, 5 Nov	VI	Computer	Introduction to AI; meaning, examples and everyday applications	Describe AI in simple terms and identify familiar AI applications	Classify examples such as voice assistants, recommendations and image recognition	Write three examples of AI used in daily life	AI example cards, projector
Fri, 6 Nov	VI	Computer	How AI learns: data, patterns, training and predictions	Explain at a basic level how data helps an AI system find patterns	Class activity: sort sample items and discuss how examples help a system classify them	Define data and pattern in the context of AI	Worksheets, projector
Sat, 7 Nov	VI	Computer	Responsible AI: privacy, fairness, checking outputs; revision and assessment	Identify safe and responsible ways to use AI tools	Discuss sample AI outputs, check accuracy and create an AI safety checklist	Write four rules for responsible use of AI	Computer, scenario cards, assessment sheet

Teacher's Signature: Kaushal Kumar Principal's Signature: Mithilesh Kumar

Note: CBSE-aligned sample plan. Adjust practical activities according to the school's prescribed Computer textbook, available software and lab facilities.

WEEKLY LESSON PLAN — COMPUTER

Session: 2026–2027 **Dates:** 2 November 2026 to 7 November 2026 **Class:** VII **Subject:** Computer **Teacher:** Kaushal Kumar

Weekly Topic: Data Science: Introduction, Data Collection and Visualization

Learning Objective: Understand the data science process, work with simple datasets, organize and interpret data, and present findings using charts.

Period / Date	Class	Subject	Topics to be Covered	Objective of the Topic	Classwork / Activity	H.W.	Teaching Aids
Mon, 2 Nov	VII	Computer	What is data science? Data, information and real-life applications	Explain data science and identify where data is used	Discuss examples from school, sports, weather and transport	Define data science and give two applications	Board, projector, textbook
Tue, 3 Nov	VII	Computer	Types of data: qualitative and quantitative; structured data	Classify simple data into appropriate types	Sort sample entries such as names, ages, marks and favourite subjects	Give two examples each of qualitative and quantitative data	Data cards, worksheet
Wed, 4 Nov	VII	Computer	Data collection: surveys, observation and records; asking clear questions	Identify simple methods of collecting useful data	Prepare a short class survey and record responses in a table	Write three questions suitable for a class survey	Notebook, survey sheet
Thu, 5 Nov	VII	Computer	Organizing data: rows, columns, headings and data cleaning	Arrange data clearly and spot missing or inconsistent entries	Clean a sample class dataset and correct obvious errors	Write two examples of data errors	Computer, spreadsheet software
Fri, 6 Nov	VII	Computer	Understanding data: totals, minimum, maximum and average	Calculate and explain simple summaries from a dataset	Use a small marks dataset to find total, highest, lowest and average	Practise finding the average of five numbers	Computer, spreadsheet software
Sat, 7 Nov	VII	Computer	Data visualization: bar chart and pie chart; mini survey report	Choose a suitable chart and communicate one finding	Create a chart from class survey data and explain the result	Write two observations from the chart	Computer, projector, assessment sheet

Teacher's Signature: Kaushal Kumar Principal's Signature: Mithilesh Kumar

Note: CBSE-aligned sample plan. Adjust practical activities according to the school's prescribed Computer textbook, available software and lab facilities.

TRIDENT PUBLIC SCHOOL, GAVANDRA, EAST CHAMPARAN (BIHAR)

WEEKLY LESSON PLAN — COMPUTER

Session: 2026–2027 **Dates:** 2 November 2026 to 7 November 2026 **Class:** VIII **Subject:** Computer **Teacher:** Kaushal Kumar

Weekly Topic: Data Science: Data Analysis, Statistics and Visualization

Learning Objective: Follow a basic data science workflow, prepare a dataset, calculate descriptive statistics, create visualizations and communicate evidence-based findings.

Period / Date	Class	Subject	Topics to be Covered	Objective of the Topic	Classwork / Activity	H.W.	Teaching Aids
Mon, 2 Nov	VIII	Computer	Data science workflow: question, collect, prepare, analyze and communicate	Describe the stages of a basic data science project	Map a school-related question to each stage of the workflow	Write the five stages of the data science workflow	Board, projector, notebook
Tue, 3 Nov	VIII	Computer	Datasets, variables, observations and data types	Read a dataset and distinguish variables from observations	Inspect a sample student performance dataset and identify its fields and records	Define dataset, variable and observation	Sample dataset, computer
Wed, 4 Nov	VIII	Computer	Data quality: missing values, duplicates, inconsistent formats and outliers	Identify common data-quality problems and suggest corrections	Find and correct errors in a teacher-provided sample dataset	List four common data-quality problems	Computer, spreadsheet software, worksheet
Thu, 5 Nov	VIII	Computer	Descriptive statistics: mean, median, mode, minimum and maximum	Calculate basic statistical measures and interpret what they show	Analyze a small marks dataset and calculate mean, median and mode	Solve one example each of mean, median and mode	Computer, calculator, practice sheet
Fri, 6 Nov	VIII	Computer	Data visualization: choosing bar, line and pie charts	Select a chart that matches the question and dataset	Create a chart and add a clear title, labels and units	State when a bar chart and a line chart are useful	Computer, spreadsheet software, projector
Sat, 7 Nov	VIII	Computer	Mini data science project: analyze class survey; findings and limitations	Present a conclusion supported by data and mention a limitation	Prepare a small report with question, dataset, chart and two findings	Complete the project reflection and revise key terms	Computer lab, project rubric

Teacher's Signature: Kaushal Kumar Principal's Signature: Mithilesh Kumar

Note: CBSE-aligned sample plan. Adjust practical activities according to the school's prescribed Computer textbook, available software and lab facilities.
